Project Name	Visualising and Predicting Heart Diseases with an Interactive Dashboard
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture (SA) is an architectural a description of a specific solution. Solution architecture is a complex process with many sub-processes that bridges the gap between business problems and technology solutions. Its goals are to:

- To solve existing business problems, find the best solution.

- Describing the structure, characteristics, behavior, and other aspects of the software.

- Define features, development phases, and solution requirements to project stakeholders.

- According to which the solution is defined, managed, and delivered the specifications is provided.
